PROJECT REPORT

ON

USER JOURNEY MAP

(EMPATHY MAPS AND USER JOURNEY MAPPING)

TASK #05

NAME	:	Traver Dera
ROLL NO.	:	2K25MEUN01171
SEMESTER	:	2
COURSE	:	CRITICAL THINKING, DESIGN THINKING, LEADERSHIP AND TEAMWORK
INSTITUTION	:	Manav Rachna University
FACULTY	:	_____

SUBMITTED ON:

_____

1. Introduction

User Journey Mapping is a key technique in design thinking that helps visualize the complete experience of a user while interacting with a product or service. It focuses on understanding user actions, thoughts, emotions, pain points, and opportunities across different stages.

In this task, a User Journey Map has been created for an **AI Smart Fridge**, representing how a user interacts with the product from initial awareness to post-usage experience.

2. Objective

The objective of this task is to:

- Understand user interaction across different stages
- Identify user emotions and expectations
- Analyze pain points faced by users
- Discover opportunities for product improvement
- Enhance user experience through structured mapping

3. Product Overview

The product selected is an **AI-enabled Smart Refrigerator** that offers features such as:

- Smart inventory tracking
- Touchscreen interface
- Food management system
- Connectivity with mobile devices

4. Stages of User Journey

The user journey is divided into five key stages:

4.1 Awareness

The user becomes aware of the product through advertisements and social media.

4.2 Consideration

The user researches features, compares options, and evaluates whether the product meets their needs.

4.3 Purchase

The user selects a suitable model and completes the buying process.

4.4 Usage

The user sets up the product and starts using its smart features.

4.5 Post-Usage

The user reflects on the experience and shares feedback or reviews.

5. User Insights

5.1 Actions

Users move from discovering the product to actively using and reviewing it.

5.2 Thoughts

Users initially feel curious but may experience doubt before gaining confidence after usage.

5.3 Emotions

The emotional journey transitions from curiosity → doubt → neutrality → satisfaction → happiness.

5.4 Pain Points

- High cost of the product
- Complex features and setup
- Confusion during selection
- Maintenance concerns

5.5 Opportunities

- Simplified user interface
- Better product demonstrations
- Discounts and flexible pricing
- Improved customer support

6. Analysis

The journey map highlights that users value simplicity, affordability, and ease of use. While the product is innovative, users may face challenges in understanding and using advanced features.

Addressing these gaps can significantly improve user satisfaction and product adoption.

7. Conclusion

User Journey Mapping provides a clear understanding of the user's experience at every stage of interaction. It helps identify critical areas for improvement and ensures that products are designed with a user-centered approach.

This task demonstrates the importance of empathy in designing effective and successful products.
